

SABAH SOFTWOODS HYBRID FERTILISER SDN. BHD

KG SASAIE, KENINGAU

Owner	: Mr Paul Wong
Crop	: Ginger (Tambunan)
Amount	: 1000 polybags (fertigation)
Fertilizer	: Tricho-Acti Plus
Duration	: Since planting
Soil	: Cocopeat

Remarks:

- Ginger plants are potentially affected by soft rot and storage rot disease
- Storage rot disease are caused by destructive and versatile pathogen Fusarium species
- Application of **Tricho Acti-Plus** help to **provide defense** mechanism against other **pathogenic fungi**
- **40%** of Trichoderma CFU in the rhizome and root will increase the plant resistivity against fungal disease
